Kansas Gas Service Begins Annual Meter Replacement Program in McPherson

OVERLAND PARK, Kan. – March 18, 2021 – Kansas Gas Service is replacing natural gas meters in various areas of McPherson, Kansas, beginning the week of March 22. The project, which includes nearly 300 meters, is scheduled to take approximately six months to complete.

“To continue to provide safe and reliable service, we conduct routine inspections of our natural gas meters to confirm they are operating properly and accurately recording natural gas usage,” said Lauren Clary, Kansas Gas Service area community relations manager. “This is an annual project that we conduct in all of our operating areas, which includes replacing meters. We’ll make every effort to work as safely and quickly as possible to minimize the impact to our customers,” Clary said.

The work will take place Mondays through Fridays between 7:30 a.m. and 5 p.m., and in some instances may require natural gas service to be turned off for a minimal amount of time. In those cases, when the work is completed, a technician will need to enter the customer’s home or business to complete safety checks and relight appliances.

Customers directly affected by these projects will be notified by NPL Construction Company, the contractor assisting Kansas Gas Service. The contractors will carry photo identification badges that identify them as working on behalf of Kansas Gas Service.

Customers with questions about this project may call Kansas Gas Service at 800-794-4780.

About Kansas Gas Service

Kansas Gas Service delivers safe, clean and reliable natural gas to more than 639,000 customers in 360 communities in Kansas and is the largest natural gas distributor in the state, in terms of customers.

Kansas Gas Service is a division of ONE Gas, Inc. (NYSE: OGS), a 100 percent regulated natural gas utility that trades on the New York Stock Exchange under the symbol "OGS." ONE Gas is included in the S&P MidCap 400 Index and is one of the largest natural gas utilities in the United States.
